

About Cornerstone Capabilities

Cornerstone Capabilities is a relatively new company that has quickly changed the face of pricing analytics & revenue management tools with some of the biggest manufacturers in the Canadian CPG industry. Cornerstone's offering includes simple, affordable & ongoing tools, along with real-world senior-level experience, to deliver actionable insights, and accelerated profit growth.

The core of the business is a suite of integrated, world-class pricing & promotional tools designed to allow for making smarter & more confident decisions. During our first couple of years in business we have partnered with some of the most respected CPG companies in North America.

Job Summary

We are looking for a Business Intelligence Web Developer who will translate Cornerstone's dashboard UI/UX designs into software that delights users and solves industry-wide CPG pricing and promotion challenges. With both front-end web development and business intelligence experience, the right candidate will be motivated to combine the art of design with the science of software development. You will work directly with Cornerstone's CTO and bridge the gap between dashboard prototypes and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

- Develop new user-facing dashboards which will differentiate Cornerstone and solve industry-wide CPG pricing and promotion challenges.
- Integrate dashboards into Cornerstone's SaaS cloud platform.
- Continually investigate and adopt new open-source business intelligence libraries that will further differentiate our dashboard capabilities and wow-factor.
- Evolve Cornerstone's dashboard creation environment to enable rapid new dashboard development into the future.
- Build a dashboard test-automation framework to reduce testing cost and ensure high quality releases.
- Optimize dashboards for maximum speed and scalability
- Collaborate with other team members and stakeholders

Skills and Qualifications

- Proficient understanding of client-side scripting including CoffeeScript and jQuery.
- Proficient understanding of web markup, including HTML5, CSS3.
- Good understanding of open source libraries that bring data to life using HTML, SVG and CSS including but not limited to D3 (Data-driven documents) and Slickgrid.
- Good understanding of asynchronous request handling, partial page updates, and AJAX.
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Proficient understanding of code versioning including git.
- Basic level understanding of Ruby on Rails, Postgres database and Heroku is beneficial.
- Experience in industry leading data analytics tools such as SAS, R or Python is beneficial.
- A university degree in Computer Science or Engineering is required.
- 3+ years in front-end web development is preferred.

Compensation

Cornerstone Capabilities offers a competitive compensation package which includes a benefits package, including health & dental. We are also committed to ensuring that ALL employees share in the success.

Location: Office in Vaughan, Ontario.

Please note; Education Verification, Reference Checks and Criminal Background Checks will be administered on suitably qualified candidates. If you believe you have the profile we are looking for and you want to build a long and successful career with a company that is “changing the game” in pricing analytics, we look forward to hearing from you!

We thank you for your interest in this opportunity; however only those candidates selected for an interview will be contacted.
