

About Cornerstone Capabilities

Cornerstone Capabilities is a software and consulting company that has changed the face of pricing analytics & revenue growth management with some of the biggest manufacturers in the North American CPG industry. Cornerstone's offering is centred around our world-class software, AI capabilities, and hands-on consultative approach. Our real-world, senior-level experience ensures that we deliver actionable insights, and accelerated profit growth to our clients, that include Nestle, PepsiCo, Campbell's, Kellogg's, Dare, Maple Leaf, and more!

Job Summary

We are looking for a Full Stack Developer who will translate Cornerstone's dashboard UI/UX designs into software that delights users and solves industry-wide CPG pricing and promotion challenges. With web development and data science experience, the right candidate will be able to design and implement cutting edge predictive solutions that are both easy to use and based on solid mathematical models. You will work directly with Cornerstone's CTO and bridge the gap between dashboard prototypes and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

- Develop new user-facing dashboards which will differentiate Cornerstone and solve industry-wide CPG pricing and promotion challenges.
- Implement machine-learning approaches to predict the impact of CPG pricing and promotions strategies.
- Integrate dashboards into Cornerstone's SaaS cloud platform.
- Continually investigate and adopt new open-source business intelligence libraries that will further differentiate our dashboard capabilities and wow-factor.
- Evolve Cornerstone's Kubernetes cloud-native infrastructure
- Optimize dashboards for maximum speed and scalability
- Collaborate with other team members and stakeholders

Skills and Qualifications

- Proficient understanding of JavaScript, HTML5 and CSS
- Experience with Python, Postgres database, Ruby on Rails and Azure and AWS is beneficial.
- Understanding of Docker, Kubernetes and Cloud-Native Architecture
- Good understanding of open-source libraries that bring data to life using HTML, SVG and CSS including but not limited to D3 (Data-driven documents) and Slickgrid.
- Proficient understanding of code versioning including git and Github.
- A university degree in Computer Science or Engineering is required.
- 3+ years in front-end web development is preferred

Compensation

Cornerstone Capabilities offers a competitive compensation package which includes a benefits package, including health & dental. We are also committed to ensuring that ALL employees share in the success.

Location: Office in Vaughan, Ontario.

Please note; Education Verification, Reference Checks and Criminal Background Checks will be administered on suitably qualified candidates. If you believe you have the profile we are looking for and you want to build a long and successful career with a company that is “changing the game” in pricing analytics, we look forward to hearing from you!

We thank you for your interest in this opportunity; however only those candidates selected for an interview will be contacted.
